

PRETIUM

HEALTHCARE
STOCK PRODUCT CATALOG

CAPABILITIES

Since 2019, Pretium has made multiple acquisitions that brought industry-leading healthcare packaging into our stock product portfolio. We now own brands and product lines that healthcare customers across the globe have counted on for decades, including the Starplex Scientific brand of specimen collection and transport devices.

Elements that set us apart include:

- ▶ Reliable support for medium-run volumes, including multiple SKUs in mixed truckloads
- ▶ Sophisticated engineering capabilities paired with a willingness to take on complexity
- ▶ Hundreds of stock molds across multi-resin manufacturing capability (PET, PP, HDPE, LDPE, CS, PCR, Bio-Resin, Prevented Ocean Plastic)
- ▶ Ability to make to forecast and maintain local safety stock
- ▶ Regional & market-based organization model provides unique focus.

OUR HEALTHCARE PORTFOLIO INCLUDES PRODUCTS AND SERVICES FOR FOUR PRIMARY AREAS:

Laboratory Specimen Collection

With over 30 years in this market, we have become a trusted supplier of sample collection and transportation products for both the clinical and industrial markets for the Starplex branded products. We are privileged to supply literally thousands of hospitals, laboratories and health care facilities with Starplex products.

Pharmaceutical

We understand the stringent requirements for healthcare packaging, and want to make healthcare professions easier and safer. All bottles and jars produced for healthcare customers are made with resins and colorants that comply with applicable FDA food contact regulations. We also maintain a Drug Master File for the convenience of our pharma customers.

Life Sciences

Pretium has many unique and proprietary applications that have made us a strategic supplier to the Life Sciences/Diagnostics market. Our packaging is critical to the supply chains of testing laboratories across North America who they rely on us for proprietary solutions. We can provide UN Testing and Qualification through our QC lab, and we're one of the few blow molders who can also provide customized kitting services to the demanding life sciences market.

OTC/Retail Consumer Health

Pretium has partnered with the world's leading brand owners in the market to create innovative packaging designs with speed. We have decades of experience, many lines of stock offerings, and custom capabilities for the OTC/Retail Consumer Health Market.

WWW.PRETIUMPKG.COM

HISTORY

Pretium's leading position in the healthcare segment is the result of two acquisitions that form the most trusted portfolio of healthcare packaging options in the industry.

Starplex is dedicated to the development of innovative, premium quality disposables, providing reliable specimen transportation for many facets of the healthcare industry. In addition to this brand, Pretium's healthcare division is also able to serve the pharmaceutical market with a comprehensive line of plastic bottles to serve as a partner to companies in the life sciences sector.

Starplex was founded in the 1970s in Toronto, Ontario, specializing in specimen collection containers and swab kits. The company created the Medioplast HDPE packer line for generic drugs and nutraceuticals in 2005, and Starplex expanded to Tennessee in 2008 to service the U.S. market with bottles and specimen collection containers. A third location in Montreal supports our healthcare product lines. The brand was acquired by and adopted as Pretium's Healthcare brand in 2019. Starplex is the recognized leader of quality specimen collection jars, diagnostic swab kits, and plastic containers for the medical and consumer health markets.

Alpha Packaging was acquired in 2021 and brought eight additional manufacturing locations in the U.S., Canada and Europe, as well as a broad portfolio of healthcare packaging solutions.

The Alpha brand is well known for its extensive range of HDPE packers ranging in size from 30cc to 1500cc. Several distinct product lines are offered from different FOB points to serve customers across the United States and Canada. In addition, Alpha brought a wide array of narrow-neck PET bottles ranging in size from 1 ounce to 1 liter to serve the liquid OTC pharma industry. Most of Alpha's PET bottles and jars are made in multiple locations, so healthcare brands can take advantage of FOB points close to their filling locations.

Alpha Packaging also excelled in sustainable solutions including post-consumer resin (PCR), plant-based bioresins and light-weighted bottles and jars, all with FDA compliant materials.

CORE PRODUCT LINES

Starplex is dedicated to the development of innovative, premium quality disposables; providing reliable specimen collection and transportation for many facets of the health care industry. Starplex strives to anticipate the evolving market requirements and work cooperatively with customers to implement unique, effective solutions. Our core product lines are represented on the following pages, and additional information is available at www.starplexscientific.com.

Specimen Collection and Transport

Leakbuster™ with Molded “O-Ring” Cap

This premium quality line of containers consists of 60ml, 90ml, wide 90ml and 120ml sizes for leakproof transportation. Each polypropylene container is lot numbered and has clear graduations. The wide 90ml and 120ml containers feature a QuickTurn™ cap closure for easy application. Sterile containers have an orange cap and tamper tab patient label. The patient identification labels meet current standards.

Ideal for operating room use, both the 90ml and 120ml containers are packaged in a sterile, clear plastic peel pouch. Also available with a white, or orange cap.

Leakbuster™ with Temperature Strip

Our standard, premium quality container featuring an orange molded “o-ring” cap, sterile tamper-evident patient identification label, which meets requirements, and a temperature strip. The temperature strip measures a range from 90F-100F/32C-38C in a clear, easy to read format. Each container is date stamped for full traceability and meets DOT and IATA standards. Also available in a non-sterile format with a white or yellow cap.

Leakbuster™ 3

Our Leakbuster 3 specimen container features a tamper evident cap that ensures proper cap application by providing visual alignment points, audible closure confirmation and distinct tactile closure confirmation. Each container is lot numbered and has clear graduations. The textured, flat cap provides additional writing surface in a stackable format.

CORE PRODUCT LINES

StarCLICK 100™

100ml capacity, available in sterile and non-sterile formats. The solid, straight wall design of the container paired with the durable cap creates the optimal fit for preventing costly spills and biohazardous contamination. This container is ideal for pneumatic tube systems and can be a suitable replacement for metal capped containers in certain applications.

- ▶ Clear graduations on two sides in ounces and millilitres
- ▶ Wide mouth design
- ▶ Food grade polypropylene container and polyethylene caps
- ▶ Stackable
- ▶ Tamper evident patient label

Midstream Collection

For Midstream Collection, the sterile 120ml container is conveniently packaged in a clear plastic peel pouch with a castile wipe. Also available is a sterile narrow 90ml container with funnel attached and packaged with a cap, separate patient label, and castile wipe in a resealable transport bag.

Magenta Lined Cap

The original magenta, flat, lined cap is available with either a 60ml or 90ml sterile polypropylene container. The non-stick silicone layer cap liner provides additional assurance against content leakage.

Histoplex™ Containers

Histoplex™ containers are carefully engineered for the storage and light transport of histology specimens. The secure seal of the 20ml – 1 litre containers reduces most formalin leakage and evaporation. All empty containers are supplied with 10% neutral buffered formalin warning labels. The Histoplex product line includes molded “o-ring” containers from 5ml to 120ml; screw cap containers from 250ml to 1 litre; and 2, 5, 8, 9.5 and 20-litre tamper evident pails with snap-on lids.

CORE PRODUCT LINES

Molecular and Anaerobic Transport

Media

The media tube is designed with a spiral groove, round bottom media chamber which keeps the sample immersed and protected in the media. The color coded caps are easily identified and feature a protective biohazard overskirt. Each tube has a patient identification label and product code, lot number and expiry date.

A full range of media formulations include: Modified Liquid Stuart's, Modified Amies Clear, Modified Amies Charcoal, and Modified Liquid Amies. Amies Clear and Amies Charcoal provide an ideal environment for the survival of anaerobic organisms.

Modified Liquid Stuart's and Modified Liquid Amies provides excellent recovery in routine bacteriology and is compatible with gram stain and many rapid screening methods. Shelf life is 18 months.

Modified Amies Clear Gel

Provides excellent survival for a wide range of bacteria and is compatible with gram stain. Shelf life is 24 months.

Modified Amies Charcoal Gel

Further enhances the survival of fastidious organisms including *Neisseria gonorrhoeae* by neutralizing any fatty acids that may be present in the specimen.

Swabs

The media can be paired with a variety of swab tips and shafts. Studies available upon request.

- ▶ Single swab, plastic shaft with rayon tip
- ▶ Double swab, plastic shaft with rayon tip
- ▶ Straight Wire shaft with rayon tip

Sterile peel pouch single or double packed swabs are packed in a premium thickness bag that creates a barrier environment to prevent premature medium dehydration. A resealable closure promotes resealing to maintain swabs at peak performance.

CORE PRODUCT LINES

Multitrans – Multipurpose Rapid Antigen testing device Including DFA, culture and molecular-based assays for Viruses, Chlamydia, Mycoplasma and Ureaplasma.

The Multitrans medium and glass beads are held within a durable polypropylene vial and capped with a skirted, swab retaining cap. The swab applicator is scored so that it is easily snapped off into the vial; after capping and reopening, the swab is neatly inserted into the cap for easy, contamination free handling. The media vial and sterile wrapped swab are packaged in a plastic peel pack.

The media tube is available with:

- ▶ Standard polyester swab
- ▶ Standard flocked swab
- ▶ Nasopharyngeal flocked swab
- ▶ Combination Pack with both a standard and minitip nasopharyngeal flocked swab

Anerobic Transport System

Especially for fastidious anaerobes

The Anerobic Transport System is a self-contained, sterile, ready to use system which includes a glass tube containing a semi-solid, pre-reduced transport medium. It is intended for maintaining the viability of a wide variety of microorganisms during transportation for up to 48 hours. Both a 7ml and 5ml media fill are available.

Transport Vials

Urine Culture / Urinalysis Preservative Vial
With 75mg Boric Acid Tablet

Suitable for the transport of specimens for either Urinalysis or Urine Culture, this sterile, 10ml Conical Vial utilizes a Boric Acid tablet to maintain the specimen for up to 72 hours. The vial is capped with a flat, blue cap which provides leak resistant transport. The vial has a patient identification label with fill line volume requirements. Studies available upon request.

False Bottom Vials

Leak resistant polypropylene False Bottom Vials are available with a threaded or non-threaded neck finish in clarified polypropylene or amber. Two different centre conical finishes are available to be compatible with various automation or analyzer options.

PACKAGING FOR PILLS & TABLETS

HDPE PHARMA LINE ROUND PACKERS

The Pharma Line of HDPE packers is Pretium's full line of bottles designed to meet the needs of pharmaceutical and nutritional supplement customers who require pharmaceutical-grade bottles that match the industry's most common specs. These bottles are available for low minimums; please speak with your Pretium sales representative for details.

HDPE VET LINE PACKERS

Our HDPE Vet Line offers a full range of bottles from 30cc to 750cc capacity. Fill lines are available on the 120cc (100cc fill line) and 200 cc (150cc fill line), and are ideal for a wide range of human and animal health applications. Bottles are manufactured in our Starplex facility in Cleveland, Tennessee with convenient shipping to the southeastern US. This line is also known in the industry as part of the Mediplast product line.

HDPE ROUND PACKERS (C/T)

Straight sided wide mouth HDPE Packers are typically used for pharmaceuticals, vitamins and nutritional supplements in pill or tablet form. This basic packer style, featuring a continuous-thread (C/T) neck finish, is manufacture in St. Louis, Missouri, but we also have several other styles of round packers made in other regions.

PACKAGING FOR PILLS & TABLETS

HDPE “QUALITY LINE” PACKERS

This line of HDPE Packers originated in Ypsilanti, Michigan, but the molds have been moved to other plants in the Pretium network. We retained the most popular sizes in this product line because so many pharmaceutical customers have these specified for their FDA filings.

HDPE OBLONG SPACE SAVERS

Pretium manufactures three different large, wide mouth HDPE Oblong Space Savers. The oblongs are shorter and more squat than our Shelfpacks/Blakes with a larger label panel area and wider neck openings. They are designed to fit more products on a standard shelf than with round packers.

Size	Mold #	Overflow	Neck Finish	Case Pack	Weight	Height x Width x Depth	Process
32oz	32SPS53	1000cc	53-400	116	68.0	7.050 x 4.131 x 2.787	EBM

PACKAGING FOR PADS, OINTMENTS & POWDERS

HDPE WIDE MOUTH JARS

Pretium's line of HDPE Wide Mouth Jars is ideal for everything from food products to nutritional supplements to personal care products, such as bath salts, gels and body scrubs. Some jars have straight sides that are as wide as the neck opening, and some jars have shoulders. Please request a sample of the jar you are interested in to verify the shoulder type.

HDPE LOW-PROFILE JARS

Our line of low profile HDPE jars is designed to mate flush with child-resistant closures (CRCs) from MRP Solutions. These jars are suitable for any product that requires child-resistant packaging, including legalized cannabis products, iron supplements, pain relievers and other OTC products. They can also work with standard continuous-thread (CT) closures.

WWW.PRETIUMPKG.COM

PET ROUND PACKERS (C/T)

Straight sided wide mouth packers are typically used for pharmaceuticals, vitamins and nutritional supplements in pill or tablet form. Pretium's flagship line of PET packers feature a square bead beneath the threads for enhanced performance of tamper-evident shrink bands. They also have more rounded shoulders than competitors' styles.

PACKAGING FOR PILLS & TABLETS

PET APOTHECARY ROUND PACKERS

Apothecary style packers are typically used for pharmaceuticals, vitamins and nutritional supplements in pill or tablet form. This style of packer features a large sloped shoulder surface which allows you to display product above the label area. PET Apothecary packers are also available with J-Cap/Hinge-Guard closures with a minimum order requirement; please contact your Sales Representative for details.

PET PINCH WAIST PACKERS

Pretium's line of PET Pinch Waist Packers features a 53mm neck across all four sizes, so the line is ideal for filling large tablets and supplements in gummy form. The neck threads are also deep enough to accept a CRC closure. The sleek tapered waist sets your product apart on retail shelves, and works particularly well with full-body shrink sleeves.

Size	Base Part Code	Overflow	Neck Finish	Case Pack	Weight	Height x Diameter	Process

PACKAGING FOR PILLS & TABLETS

PET ECO-LINE PACKERS

Pretium's Eco-Line packers utilize an optimized preform and are designed for sustainability. Some sizes are up to 30% lighter than our traditional PET Round Packers. Eco-Line packers are made in Salt Lake City, Utah and Hazleton, Pennsylvania, to satisfy customers across North America. They are sold in full truckload quantities of bagged pallets, and colors may require a higher MOQ.

PACKAGING FOR PADS, OINTMENTS & POWDERS

PET WIDE MOUTH JARS

Our extensive line of PET Jars is ideal for OTC healthcare and animal health products. Ranging in size from 1 ounce to 32 ounces, this line is known as the Alpha Packaging jar family. We manufacture most of these sizes at multiple locations across North America, so customers can choose from FOB points in Jacksonville, Florida; St. Louis, Missouri; Bethlehem, Pennsylvania; Carrollton, Texas; and Salt Lake City, Utah.

PET SEAMLESS JARS

Our line of Seamless PET jars are clearly different as the result of a revolutionary molding process that produces seamless, crystal clear jars without waves or distortion. These recyclable jars also have lighter construction compared to conventional PET jars for a sustainability success story. Manufactured in the Chicagoland area, we can make these jars and corresponding closures from a central location.

PET CRC-COMPATIBLE JARS

This new product line expansion is a family of PET jars designed to mate with 63mm and 70mm push-and-turn child-resistant closures with a “flush fit” design that eliminates the awkward “overhang” of the CRC closure. This sleek new product line is ideal for any products that require a CRC closure.

PACKAGING FOR PADS, OINTMENTS & POWDERS

PP STRAIGHT SIDED JARS

This family of Olcott Single Wall Polypropylene Jars is ideal for products that require a higher filling temperature. Each size is available in regular polypropylene, and can also be injection molded from clarified polypropylene when you need a higher filling temperature but still want a clear container.

HDPE METRO CYLINDERS

Pretium's line of HDPE Metro Cylinders is a competitively-priced line of injection blow molded cylinders manufactured in our Hillsborough, New Jersey plant. These versatile bottles are ideal for any personal care application. We're calling them the Metro line because brands and CMOs all along the East Coast take advantage of this full product line made right in their back yard.

PET MODERN ROUNDS

Modern Rounds are ideal for liquid pharmaceuticals and supplements, and a variety of neck finishes accommodate pumps, droppers and sprayers. Our 1-ounce style features straight sides, while the 2-, 4-, 8-, 12-, 16- and 32-ounce styles all have indented label panels. The indented label panel area gives added protection to the label on retail shelves.

PACKAGING FOR LIQUIDS & TOPICALS

PET METRIC OBLONGS

Our line of PET Metric Oblongs offers a wide variety of sizes for OTC liquid healthcare products, and the wide label panel area gives you ample space for patient information. The 100ml Metric Oblong is also available in a slightly heavier (15.5 gram) 2-stage (reheat and blow) version from our Cleveland, Ohio plant with a case pack of 475.

PET CAPRI OVALS

Capri Ovals come in three popular sizes and several neck finishes, ideal for your full line of liquid OTC products. This graceful, slope-shouldered bottle looks especially good in metallic colors, which catch the light and emphasize the unique oblong shape.

Size	Mold #	Overflow	Neck Finish	Case Pack	Weight	Height x Width x Depth	Process

PET 38MM BULLET ROUNDS

Our line of 38mm PET Bullet Rounds is ideal for liquid OTC products that need a wider neck opening. The bottles are easy to label, screen print or shrink wrap. The 38mm neck gives these bottles a different shelf presence than traditional narrow-neck bullet-style bottles.

Size	Mold #	Overflow	Neck Finish	Case Pack	Weight	Height x Diameter	Process
9oz	009-016A	282.0ml	38-400	240	19.5	5.176 x 2.260	RHB
12oz	012-006	412.0ml	38-400	250	23.7	5.983 x 2.600	RHB
16oz	016-119A	511.0ml	38-400	200	36.5	7.000 x 2.600	RHB

PET BELL ROUNDS

Two sizes of PET Bell Rounds give you a prominent shelf presence and wide label panel area for branding.

Size	Mold #	Overflow	Neck Finish	Case Pack	Weight	Height x Diameter	Process
8oz	M1045	265.8ml	24-410	400	20.0	4.550 x 2.620	RHB

PET TAPERED OBLONGS

We introduced the 2-ounce Tapered Oblong in response to customers who wanted a sleek, sample-sized bottle that could easily travel in carry-on luggage.

Size	Mold #	Overflow	Neck Finish	Case Pack	Weight	Height x Width x Depth	Process
2oz / 60ml	2OB20410PET	66.5ml	20-410	1120	8.2	3.750 x 1.595 x 1.100	ISBM

PACKAGING FOR LIQUIDS & TOPICALS

PET DELTA OBLONGS

Pretium's PET Delta Oblongs offer a broad label panel area, and a very shallow bottle ideal for medicine cabinets. This is a great stock option for any brand that wants to compete with the category leaders.

Size	Mold #	Overflow	Neck Finish	Case Pack	Weight	Height x Width x Depth	Process
120ml	004-057	153.0ml	24-410	380	15.5	4.815 x 2.440 x 1.125	RHB
240ml	007-013A	267.0ml	24-410	200	21.0	5.815 x 3.060 x 1.380	RHB

PET CYLINDERS

Pretium offers an extensive line of PET Cylinders, including three sizes we refer to as our Slim Cylinders. The Slim Cylinders feature thick walls for a glass-like look and feel. Any of the Cylinder styles made with the RHB (reheat and blow) molding process have a 50,000-piece minimum.
