

THE LARGEST LINE OF PET PACKERS, NOW EVEN MORE ENVIRONMENTALLY-FRIENDLY

Pretium offers the widest range of straight sided PET packers in the industry.

These versatile bottles are typically used for pharmaceuticals, vitamins and nutritional supplements in pill, tablet or gummy form - but can also be used in personal care, food and consumer chemical applications. The clear, shatterproof and recyclable resin accepts colourants well. **Bottles are available in both virgin resin and rPET.**

In addition to the standard weight bottles, we have recently undertaken a sustainability initiative to substantially lightweight our most popular sizes of PET packers. **These lightweight options reduce the amount of material in each bottle by up to 42% while still maintaining performance in filling lines, during transportation and at retail.**

VOLUME (ML)	NECK DIAMETER* (MM)	PIECES / PALLET	MOQ	STANDARD WEIGHT OPTION (g)	LIGHTWEIGHTED OPTION (g)	MATERIAL REDUCTION LIGHTWEIGHTED OPTION
