

A FULL LINE OF HDPE PACKERS FOR PHARMACEUTICAL & SUPPLEMENT COMPANIES

The HDPE Pharma Line of high density polyethylene packers is Pretium's flagship line of tablet bottles, designed to meet the needs of pharmaceutical and nutritional supplement customers who require pharmaceutical grade bottles. Sizes up to 300cc are manufactured using the injection blow moulding process (IBM). The IBM process gives us very tight tolerances for neck finishes. Larger packers are extrusion blow moulded (EBM) on high-cavitation equipment. **EBM production lines also feature state-of-the-art vision systems and leak detectors.**

HDPE Pharma Line Packers are available in full pallets. Minimum order quantities for each size are 10,000 units, rounded up to the nearest pallet quantity. **Speak with your Pretium account manager for details.**

VOLUME (ML)	NECK FINISH	WEIGHT (G)	HEIGHT (MM)	DIAMETER (MM)	PIECES / PALLET	MOQ
50	33-400	16.0	68.43	36.61	23,000	23,000
75	33-400	16.0	75.64	43.31	17,000	17,000
100	38-400	16.0	81.92	46.66	12,800	12,800
120	38-400	21.0	86.36	51.18	10,200	10,200
150	38-400	21.0	94.62	56.12	8,300	16,600
175	38-400	38.0	97.79	55.68	7,500	15,000
225	45-400	24.0	107.67	60.45	5,600	13,200
275	45-400	24.0	113.72	63.68	5,400	10,800
300	45-400	28.0	125.48	65.63	4,080	12,240
400	45-400	37.0	132.59	73.53	3,600	10,800
500	53-400	37.0	141.22	78.74	2,800	11,200
625	53-400	37.0	156.69	81.20	2,800	11,200
750	53-400	37.5	166.12	88.24	1,440	10,080
